Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. This action is in response to the application filed on December 5, 2000. Claims 1-8 are pending.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 8 is rejected under 35 U.S.C. 102(e) as being clearly anticipated by Baentsch, U. S. Patent 6,536,671.

Per claim 8:

A) Baentsch clearly teaches the claimed invention with figures 1, 2A and 2B including monitoring a voltage level (Vcc) and judging whether the voltage level is in an operating area (normal power), operation forbidden area (no or non-operational power) or an operation waiting area (power failure voltage handler area supplied by capacitor 15), bringing the on-executing process into the waiting state without ending the process (figure 2A and bringing the contents of the executing process and/or the contents of the processors registers to persistent memory for re-starting the process at the stop point), ending the process (element 33 of figure 2A) and restarting the process in a waiting state (figure 2B) at column 7, line 32 – column 24.
